The manufacturer is constantly working to improve all types and models. Therefore, please be aware that we reserve the right to make changes to the shape, equipment and technology.

Symbol	Explanation
	Read instructions Please read the information in these instructions carefully to understand all of the benefits of your new appliance.
	Full instructions on the internet You can find detailed instructions on the internet using the QR code on the front of these instruction or by entering the service number at home.liebherr.com/fridge-manuals . The service number can be found on the serial tag: <i>Fig. Example illustration</i>
	Check appliance Check all parts for transport damage. If you have any complaints, please contact your agent or customer service.
	Differences These instructions apply to a range of models, so there may be differences. Sections that apply to certain models only are indicated by an asterisk (*).
	Instructions and results Instructions are marked with a ►. Results are marked with a ▷.
	Videos Videos about the appliances are available on the YouTube channel of Liebherr-Hausgeräte.

These operating instructions apply to:

- SRFvg 3501

- SRFvg 3511
- SRFvg 4001
- SRFvg 4011
- SRFvg 5501
- SRFvg 5511

1 The appliance at a glance

1.1 Included in delivery

Check all parts for transport damage. If you have any issues, please contact your dealer or Customer Service. (see 8.3 Customer service)

The delivery contains the following parts:

- Freestanding appliance
- Equipment *
- Installation materials *
- Operating instructions
- Service brochure
- Quality certificate *
- Power cable
- Handle incl. screws and Torx tool
- Wall fastening kit

1.2 Overview of appliance and equipment

Fig. 1 Example illustration

1.3 Special features

Note

Accessories are available via Customer Service (see 8.3 Customer service) and in the Liebherr-Hausgeräte-Shop at <https://home.liebherr.com>.

1.4 Range of appliance use

Intended use

This laboratory refrigerator is suitable for professional storage of products at temperatures between 3 °C and 16 °C.

Typical products to be stored include research samples, reagents, laboratory inventory etc.

It is necessary to use an independent alarm system with permanent monitoring if storing valuable or temperature-sensitive substances or products. This alarm system must be designed in such a way that every alarm state is immediately registered by a competent person who then takes appropriate measures.

Foreseeable incorrect use

Do not use the appliance for the following applications:

- Storage and cooling of:
 - Chemically unstable, flammable or corrosive substances
 - Blood, plasma or other body fluids for the purpose of infusion, application or introduction in the human body.
- Use in potentially explosive atmospheres.
- Use outdoors or in areas exposed to dampness and splashing water.

Any misuse of the appliance may result in damage to or spoilage of stored goods.

Climate classes

General safety instructions

The climate class for your appliance is printed on the identification plate.

Fig. 3 Type plate

(X) The climate class states the ambient conditions in which the appliance can be operated safely.

Climate class (X)	max. room temperature in °C	max. rel. humidity in %
7	35	75

Note

The minimum permitted room temperature at the setup location is 10 °C.

Slight condensation may form on the glass door on the side walls if the boundary conditions are exceeded.

1.5 Sound emission of the appliance

The A-weighted emission sound pressure level during operation of the appliance is below 70 dB(A) (sound power rel.1 pW).

1.6 Conformity

The refrigerant circuit has been tested for leaks.

This appliance complies with the applicable safety regulations and with EU directives 2014/35/EU, 2014/30/EU and 2011/65/EU.

The full text of the EU Declaration of Conformity is available on the following website: www.liebherr.com

2 General safety instructions

Please keep these operating instructions in a safe place so you can refer back to them at any time.

If you pass the appliance on, please hand these operating instructions to the new owner.

Read these operating instructions before use in order to use the appliance safely and correctly. Follow the instructions, safety instructions and warning messages included at all times. They are important for ensuring you can operate and install the appliance safely and without any problems.

Dangers for the user:

- This appliance may only be used by specialist and laboratory personnel who have been trained for this purpose and are familiar with all the safety measures for work in a laboratory. Children and persons with impaired physical, sensory or mental abilities or with a lack of experience and knowledge may not commission or operate this appliance.
- The socket must be easily accessible so that the appliance can be disconnected quickly from the electricity in an emergency. It must not be located in the area behind the appliance.
- Always hold the plug of the cable when disconnecting the appliance from the power supply. Do not pull on the cable.
- Remove the plug or disconnect via the fuse if there is a malfunction.
- **WARNING:** Do not damage the power cable. Do not operate the appliance with a faulty power cable.
- **WARNING:** Multi-sockets/power distributors and other electronic appliances (such as halogen transformers) may not be placed and operated behind appliances.
- **WARNING:** Do not block the ventilation openings in the appliance housing or in the installation housing.
- Repairs and work on the appliance may only be carried out by Customer Service or other specifically trained qualified personnel.
- Always follow the instructions when assembling, connecting and disposing of the appliance.

Risk of fire:

- The refrigerant contained within the appliance (specifications on the type plate) is environmentally friendly, but flammable. Leaking refrigerant can ignite.
- **WARNING:** Do not damage the refrigerant circuit.
- Do not handle ignition sources inside the appliance.
- **WARNING:** Do not use electrical appliances inside the food storage compartments of the appliance, unless they are of the type recommended by the manufacturer.
- If refrigerant leaks: Remove naked flames or ignition sources located near the area of the leak. Ventilate the room well. Contact Customer Service.

- Do not operate the appliance near explosive gases.
- Do not store or use gasoline or other flammable gases and liquids near the appliance.
- Do not store explosive substances such as aerosol cans with a flammable propellant in this appliance. You can recognize such spray cans by the printed list of contents or by a flame symbol. Any leaking gases can be ignited by electrical components.
- Keep lit candles, lamps and other objects with naked flames away from the appliance so they do not cause a fire.
- Alcoholic liquids or other containers holding alcohol must always be tightly sealed for storage purposes. Any leaking alcohol can be ignited by electrical components.

Risk of falling or toppling over:

- **WARNING:** To avoid a hazard due to instability of the appliance, it must be fixed in accordance with the instructions.
- Do not stand on the base, drawers, doors etc. or use them as improper supports.

Danger of frostbite, feeling of numbness and pain:

- Avoid prolonged skin contact with cold surfaces or chilled/frozen food or take protective measures, e.g. wear gloves.

Risk of injury and damage:

- **WARNING:** Do not use mechanical devices or other means to accelerate the defrosting process, other than those recommended by the manufacturer.
- **WARNING:** Risk of injury due to electric shock! There are live electrical parts under the cover. Have the LED interior lighting replaced or repaired only by Customer Service or other suitably trained professionals.*
- **NOTICE:** The appliance must only be operated using original manufacturer accessories or accessories from other providers approved by the manufacturer. The user bears the risk of using accessories which are not approved.

Risk of crushing:

- Do not reach into the hinge when opening and closing the door. Fingers may get trapped.

Specialist personnel qualifications:

The appliance may only be installed, tested, maintained, and commissioned by specialist personnel who are familiar with the installation, commissioning, and operation of the appliance.

Specialist personnel are persons who, on account of their specialist training, knowledge and experience as well as their knowledge of the relevant standards, are able to assess and perform the work assigned to them and identify potential hazards. They must have training, instruction, and authorization to work on the appliance.

Symbols on the device:

The symbol may be located on the compressor. It refers to the oil in the compressor and refers to the following danger: **Can be fatal if swallowed or inhaled.** This notice only applies for recycling. There is no danger during normal operation.

WARNING: Risk of fire / flammable materials. The symbol is located on the compressor and indicates the danger from flammable materials. Do not remove the label.

The symbol is located on the back of the appliance near the alarm relay and indicates the following danger: **Electric shock!** Even if an appliance is disconnected from the mains there may still be extraneous voltage. Do not remove the label.

This label or a similar one may be located on the rear of the appliance. It refers to the foam panels in the door and/or the housing. This notice only applies for recycling. Do not remove the label.

Observe the warning messages and other detailed information in the other sections:

	DANGER	Indicates an immediately hazardous situation, which if not avoided, will result in death or serious injury.
	WARNING	Indicates a hazardous situation, which if not avoided, could result in death or serious injury.
	CAUTION	Indicates a hazardous situation, which if not avoided, could result in minor or moderate injury.
	NOTICE	Indicates a hazardous situation, which if not avoided, could result in damage to property.
	Note	Indicates useful advice and tips.

3 Start-up

3.1 Setup conditions

WARNING

Risk of fire due to moisture!

If live parts or the power cord get wet, this can cause a short circuit.

- The appliance is designed for use in enclosed spaces. Do not operate the appliance in open space or in damp areas or where there is spray.

3.1.1 Setup location

WARNING

Leaking refrigerant and oil!

Fire. The refrigerant contained within the appliance is environmentally friendly, but flammable. The oil contained within the appliance is flammable. Escaping refrigerant and oil can ignite if they are of high enough concentration and are exposed to an external heat source.

- Do not damage the pipelines of the coolant circuit and the compressor.

- Do not setup the appliance in direct sunlight, next to an oven, radiator or similar.
- The best place to set up the appliance is a dry and well ventilated room.
- If the appliance is set up in a very humid environment, condensation can form on the outside of the appliance. Always ensure sufficient airflow and ventilation in the setup location.
- The more refrigerant there is in the appliance, the larger the room must be in which the appliance is located. If rooms are too small, any leak may create a flammable mixture of gas and air. For every 8 g of refrigerant, the size of the installation space must be at least 1 m³. Specifications regarding the refrigerant contained within the appliance can be found on the type plate inside the appliance.
- The floor of the setup location must be horizontal and even.
- The setup location must be able to withstand the weight of the appliance plus the weight when stocked to maximum capacity. (see 8.1 Technical data)

3.1.2 Electrical connection

WARNING

Danger of fire due to incorrect positioning!

If the power supply cable or plug touches the back of the appliance, the vibration can damage the power supply cable or the plug resulting in a short circuit.

- Make sure the power supply cable is not trapped under the appliance when you position the appliance.
- Install the appliance so that it does not touch any plugs or power cables.
- Do not connect any appliances to sockets in the area of the back of the appliance.
- Do **not** place and operate power strips/power distributors and other electronic devices (such as halogen transformers) at the back of the appliances.

3.2 Appliance dimensions

SRFvg 3501/3511

A	B	C	D	E	F
1684 mm	597 mm	664 mm	1203 mm	23 mm	1241 mm

SRFvg 4001/4011

A	B	C	D	E	F
1884 mm	597 mm	664 mm	1203 mm	23 mm	1241 mm

SRFvg 5501/5511

A	B	C	D	E	F
1684 mm	747 mm	779 mm	1468 mm	23 mm	1506 mm

A = appliance height including feet/castors

B = appliance width without handle (handle depth = 45 mm)

C = appliance depth without handle (handle depth = 45 mm)

D = appliance depth with door open

E = hinge height

F = appliance depth with protruding handle and anti-tipping device

3.3 Transporting the appliance

WARNING

There is a risk of injury from pieces of broken glass.*

When transporting at an altitude of more than 1500 m, the glass panes of the door may break. This can result in sharp-edged fragments, which can cause serious injuries.

- Adopt suitable protective measures.

- On initial setup: Transport the appliance in its packaging.
- When transporting after initial setup (e.g. relocation): Transport the appliance unloaded.
- Transport the appliance upright.
- Use two people when transporting the appliance.

3.4 Unpacking the appliance

- Check the appliance and the packaging for transport damage. Contact the supplier immediately if you suspect any damage. Do not connect the appliance to the power supply.

- Remove all materials from the back or the side walls of the appliance that may prevent proper installation or prevent air flow and ventilation.

3.5 Removing the transport lock

Fig. 4

- Pull tab Fig. 4 (1) forwards.
- Take off transport lock Fig. 4 (2) in upwards direction.
- Base holder remains on the appliance.

3.6 Installing the door handle

Fig. 5

- Attach handle from accessory kit to the door using supplied screws Fig. 5 (1).
- Put on cover Fig. 5 (2).

3.7 Mounting the anti-tipping device

Tools

Fig. 6

Prevent appliance from tipping over.

Fig. 7

The anti-tipping device, consisting of two retaining parts, two retaining hooks and four screws (4 x 14), is included with the appliance.

Fig. 8

- Mount retaining parts Fig. 8 (1) on the appliance using the supplied screws.
- Push appliance with retaining parts mounted against the wall.

Fig. 9

- Make markings on the wall Fig. 9 (1).
- Remove appliance.

Fig. 10

Use fixing material (e.g. wall anchors) which is appropriate for the nature of the wall (wood, concrete) and sufficient attachment points Fig. 10 (2).

- Attach retaining hooks. Fig. 10 (1)

3.8 Setting up the appliance

CAUTION

Risk of injury and damage.

- Use 2 people to set up the appliance.

CAUTION

Risk of injury and damage.

The door can strike against the wall and become damaged as a result. In the case of glass doors, the damaged glass can cause injuries.

- Protect the door from striking against the wall. Attach a door stopper, e.g. felt stopper, to the wall.

- Connect all necessary components (e.g. power cable) to the back of the appliance and route to the side.

Note

Cables can be damaged.

- Do not crush the cable when pushing the appliance back.

Fig. 11

- Slide the appliance up against the wall so that the retaining parts latch into the retaining hooks.
- ▷ The appliance is now secured against tipping.
- ▷ It can be released by folding back the retaining hooks.

3.9 Leveling out the appliance

NOTICE

Appliance body can become deformed and door will not close.

- Align appliance horizontally and vertically.
- Compensate for uneven floors using adjustable feet.

WARNING

Incorrect height adjustment of the adjustable foot!

Severe or fatal injuries. Incorrect height adjustment can cause the bottom part of the adjustable foot to come loose and the appliance to tip over.

- Do not unscrew the adjustable foot too far.

Fig. 12

Raising appliance:

- Turn adjustable foot clockwise.

Lowering appliance:

- Turn adjustable foot counterclockwise.

3.10 Setting up multiple appliances

NOTICE

Risk of damage due to condensation between the side walls.

- Do not set up the appliance directly next to another refrigeration appliance.
- Set up appliances with a space of 3 cm between appliances.
- Only set up multiple appliances up to temperatures of 35 °C and 65 % humidity next to one another.
- At higher levels of humidity, increase the space between appliances.

Fig. 13 Side-by-side set up

Note

A side-by-side kit is available as an accessory via Liebherr Customer Service. (see 8.3 Customer service)

3.11 After setup

- Pull off the protective film from the outside of the housing.
- Clean the appliance. (see 7.3 Cleaning the appliance)
- If necessary: Disinfect the appliance.

- Keep the invoice so you have the appliance and dealer information available if needed.

3.12 Disposal of packaging

WARNING

Danger of suffocation from packaging materials and films!

- Do not allow children to play with packaging materials.

The packaging is made from recyclable materials:

- Corrugated card/cardboard
- Parts made of foamed polystyrene
- Films and bags from polyethylene
- Packing bands from polypropylene
- Wood frame nailed together with a polyethylene window*

- Take the packaging material to an official collection point.

3.13 Reversing the door

Tools

Fig. 14

WARNING

Risk of injury if the door is not reversed correctly!

- The door may only be reversed by qualified personnel.

WARNING

Risk of injury and material damage due to heavy door!

- Only perform the conversion if you can carry a weight of 25 kg.
- Always have someone help you carry out the conversion.

NOTICE

Live parts!

Damage to electrical components.

- Disconnect the power plug before reversing the door.

- Open the door.

Fig. 15

- Unlatch the front covers Fig. 15 (1) on the inside and remove them sideways.
- Lift off the upper cover Fig. 15 (2).

Fig. 16

- Unlatch the middle cover and remove it.

Fig. 17

- Disconnect the plug Fig. 17 (1) from the circuit board.

Fig. 18

- Connect the plug Fig. 18 (1) to the circuit board.

Fig. 19

- Unscrew the door latch Fig. 19 (1).
- Unlatch the cover Fig. 19 (1) with a small screwdriver and remove it.

Fig. 20

- Remove the plug from the plug holder.

Fig. 21 The installation position of the plug holder can be rotated by 180°.

- Disengage the plug holder.

Fig. 22

- Snap in the plug holder Fig. 22 (1) on the opposite side.

Fig. 23

- Put the lock and cover on the opposite side.

NOTICE

Risk of injury if the door tips out!

- Hold the door.

Fig. 24

- Unscrew the hinge Fig. 24 (1).
- Lift the door with the hinge straight up by Fig. 24 (2) roughly 200 mm and take it off.
- Carefully place the door on a soft surface.

Fig. 25

- Carefully pull out the cable.

Fig. 26

- Pull out the hinge.

Fig. 27

- Pull out the hinge bushing Fig. 27 (1) with your fingers.
- Carefully lift the cover plug Fig. 27 (2) with a slotted screwdriver and pull it out.

Fig. 28

- Insert hinge bushing and cover plug on the opposite side (the flattened sides face outwards).

Fig. 29 Insulated door*

Fig. 30 Glass door*

- Remove the panels.
- Unscrew the handle.

- Fig. 31
- Put the stopper on the opposite side.

Fig. 32 Insulated door*

Fig. 33 Glass door*

- Screw the handle onto the opposite side.
- Attach the panels.

Fig. 34

- Put the closing bracket on the opposite side.

Note

The holes are pre-marked and must be pierced with the self-tapping screws.

Fig. 35

- Move the hinge to the opposite side.

WARNING

Risk of injury and material damage if the door tips out!

- Tighten the bearing pins to the specified torque.

Fig. 36

- Put the pin back into the hinge Fig. 36 (1).
- Tighten the pin Fig. 36 (2) to a **torque of 12 Nm**.
- Unscrew the hinge again.

NOTICE

Risk of injury due to tensioned spring!

- Do not disassemble the door closing system Fig. 37 (1).

Fig. 37

- Turn the closing system Fig. 37 (2) until it clicks.
- The tension of the closing system is released.
- Unscrew the hinge Fig. 37 (3).

Fig. 38

- Put the door closing system in the hinge.
- Make sure the pin chamfer Fig. 38 (1) faces the round hole when you put it in.

Fig. 39

- Put the cover plate on the opposite side.

Start-up

Fig. 40

- Screw the hinge onto the opposite side.

Note

Correct alignment and tension are important for the closing system to work properly.

Fig. 41 Left-hinged (A) / Right-hinged (B)

- Turn the closing system against the resistance until the bar of the closing system Fig. 41 (1) points outwards.
- ▷ The closing system automatically stays in this position.
- ▷ The closing system is now aligned and pretensioned.

Fig. 42

- Put the hinge into the door.

Fig. 43

- Carefully push the cable through.

NOTICE

Risk of injury if the door tips out!

- Hold the door.

Fig. 44

- Together with a second person, lift the door from the ground.
- Carefully put the door on the closing system with the door opened at a 90° angle.

NOTICE

Material damage due to incorrect mounting!

- Do not pinch the cable when mounting the hinge.

Fig. 45

- Feed the cable through the recess in the hinge and lay it carefully Fig. 45 (1).
- Screw on the hinge Fig. 45 (2).

Fig. 46

- Put the plug Fig. 46 (1) in the plug holder.

Fig. 47

- Connect the plug Fig. 47 (1) to the circuit board.

Fig. 48

- Set the cover back in place.

Fig. 49

- Screw on the door latch.

Fig. 50

- Open the door.

Fig. 51

- Snap in the middle cover.

Fig. 52

- ▶ Hook in the front covers Fig. 52 (1) on the side and snap them into place on the inside.
- ▶ Snap on the top cover Fig. 52 (2) from above.
- ▶ Close the door.
- ▷ The door has now been reversed.

3.14 Aligning the door

If the door is not straight, you can adjust it on the lower hinge.

Fig. 53

- ▶ Remove the middle screw on the lower hinge.

Fig. 54

- ▶ Slightly undo both screws and move the door with the hinge to the left or right.
- ▶ Fully tighten the screws (the middle screw is no longer needed).
- ▷ The door is now straight.

3.15 Connecting the appliance

WARNING

Incorrect connection!
Risk of fire.

- ▶ Do not use an extension cord.
- ▶ Do not use a multipoint connector strip.

NOTICE

Incorrect connection!
Damage to the electronics.

- ▶ Do not connect the appliance to a stand-alone inverter, e.g. solar power systems and petrol generators.

Note

Only use the supplied power cable.

Make sure that the following requirements are fulfilled:

- The appliance is operated using **alternating current** only.
- The permitted voltage and frequency are printed on the type plate. The type plate location can be seen in the appliance overview chapter. (see 1.2 Overview of appliance and equipment)
- The socket is grounded and fused in accordance with regulations.
- The tripping current for the fuse is between 10 A and 16 A.
- The socket is easily accessible.
- ▶ Check the electrical connection.
- ▶ Insert the appliance plug on the rear side of the appliance. Ensure that it engages correctly.
- ▶ Connect the power plug to the power supply.
- ▷ The display switches to the standby symbol.

3.16 Switching on the appliance (first use)

Make sure that the following requirements are fulfilled:

- Appliance is set up and connected.
- All adhesive strips, adhesive and protective films and transport locks are removed from inside and outside the appliance.

Fig. 55 Startup process

The standby symbol flashes until the startup process is complete.

The standby symbol is shown in the display.

If the appliance has been supplied with factory settings, the screen language first needs to be selected when using for the first time.

The following languages are available:

- English
- Spanish

- French
- German
- Dutch
- Danish
- Italian
- Polish
- Czech

Fig. 56

- Carry out steps (see Fig. 4641) .

Fig. 57

- The appliance is switched on once the temperature appears on the display.

4 Storage

4.1 Information regarding storing items

Fig. 58

Fig. 59

When stocking items, observe the following:

- ☐ If there are adjustable shelves Fig. 58 (1), position them as required.
 - ☐ Observe maximum load. (see 8.1 Technical data)
 - ☐ Do not stock appliance until the storage temperature has been reached (maintain cold chain).
 - ☐ Ventilation slots Fig. 59 (2) for recirculation fan in the interior must be kept clear.
 - ☐ Items for refrigeration must not come into contact with the evaporator on the rear wall.
 - ☐ Keep liquids in closed containers.
 - ☐ Leave space when storing items for refrigeration to ensure adequate air circulation.
 - ☐ Do not stack refrigerated products above the indicated height. 
- This is important for free air circulation and even temperature distribution in the interior.

4.2 Storage times

The best-before date specified on the packaging should be used as the reference point for the storage time.

5 Use

5.1 Control and display elements

The display provides a quick overview of the current appliance status, the temperature setting, the status of functions and settings as well as alarm and error messages.

It is operated using the navigation arrows and confirmation symbol.

Functions can be activated or deactivated and settings values can be changed.

Fig. 60 Display

(1) Status display

(2) Backward navigation arrow

(3) Forward navigation arrow

(4) Confirm

5.1.1 Status display

Fig. 61 Status display with actual temperature

The status display shows the actual temperature and is the home display. You navigate from here to the other functions and settings. (see 5.2 Navigation) The status display may show a range of display symbols.

5.1.2 Display symbols

The display symbols provide information about the current status of the appliance.

Symbol	Appliance status
	Standby Appliance is switched off.

Symbol	Appliance status
	Flashing standby symbol Appliance is starting up.
	Flashing temperature Target temperature not yet reached. Appliance cooling to set temperature.
	Temperature display Displays the current interior temperature.
	Display alternating between temperature/defrost symbol with white bar Appliance is in manual defrosting mode.
	D in the display Appliance is in DemoMode.
	Maintenance reminder The time set interval has expired.
	Data memory full The data memory (999 hours) is full. From now, the oldest data will be overwritten.
	Flashing symbol A fault is still present.
	Error symbol Appliance is still malfunctioning.
	White bar at the bottom Submenu
	White bar at the top Default, active setting or active value.
	Increasing bar Press button for 3 seconds to activate setting.
	Decreasing bar Press button for 3 seconds to deactivate setting.

Status display symbols

5.1.3 Acoustic signals

A signal sounds in the following cases:

- If a function or a value is confirmed.
- If a function or a value can neither be activated nor deactivated.

- As soon as a fault occurs.
- If there is an alarm message.

The alarms can be switched on and off in the customer menu.

5.2 Navigation

Navigate in the menu to access the individual functions. The appliance is operated with the buttons next to the display.

5.2.1 Navigating with buttons

Display and button	description
	Forward navigation arrow Advances to next menu (submenu). After the last menu page appears, it goes back to the first menu page.
	Backward navigation arrow Short press: Goes back one menu (submenu). Long press (3 seconds): Returns to the status display.
	Scrolling Pressing multiple times: Scrolls through the menu (submenu).
	Confirm Activate / deactivate function. Open submenu. Confirm selection. The display switches back to the menu.
	Back Jumps back one level.

5.2.2 Settings menu

The following functions can be accessed in the settings menu:

- Temperature (see 5.3.3 Temperature)
- Temperature alarm (see 5.3.21 Temperature alarm)
- Door alarm (see 5.3.22 Door alarm)
- Light alarm (see 5.3.23 Light alarm)
- Alarm simulation (see 5.3.24 Alarm simulation)
- External alarm monitoring (see 5.3.25 Alarm relay)
- Calibration (see 5.3.20 Sensor calibration)
- Lighting (see 5.3.3 Temperature) *
- Maintenance interval reminder (see 5.3.8 Maintenance interval reminder)
- Language (see 5.3.9 Language)
- Temperature unit (see 5.3.10 Temperature unit)
- Display brightness (see 5.3.11 Display brightness)
- LAN connection (see 5.3.15 LAN connection) *
- WiFi connection (see 5.3.14 WiFi connection) *
- Switching off the appliance (see 5.3.2 Switching appliance on and off)

Opening the settings menu

- Press the navigation arrow repeatedly until the corresponding function is displayed.

Fig. 62

- Carry out steps (see Fig. 4647) .

-or-

- Enter access protection PIN code for settings menu. (see 5.3.6 Settings menu access protection)

- The settings menu is opened. From here you can access all of the above functions.

Settings menu access protection

(see 5.3.6 Settings menu access protection)

5.2.3 Customer menu

The customer menu enables access to the following hidden functions by entering the numerical code **151**:

- Operating hours (see 5.3.17 Operating hours)
- Software version (see 5.3.18 Software)
- Code change for settings menu access protection (see 5.3.7 Access codes)
- Settings menu access protection (see 5.3.6 Settings menu access protection)
- Alarm sounds (see 5.3.12 Alarm Sound)
- Confirmation sounds (see 5.3.13 Key Sound)
- Defrost info (see 5.3.19 Defrosting)
- DemoMode (see 5.3.26 DemoMode)
- Factory reset (see 5.3.27 Factory reset)

Opening the customer menu

- Open settings menu (see 5.2 Navigation) .
- Press the navigation arrow repeatedly until the corresponding function is displayed.

Fig. 63

- Carry out steps (see Fig. 4648) .

- The hidden customer menu is opened. From here you can access all the specific menus.

5.2.4 Setting values

Display values can be set in the submenu in combination with the navigation arrow:

Display and button	description
	Increases a value.
	Reduces a value.

5.2.5 General rules

The following general rules apply in addition to the buttons available:

- Once a value has been selected, the display is shown for 2 seconds before jumping back one level.
- If no selection is made after 10 seconds, the display switches to the status display.
- If a selection is confirmed in a submenu, the display switches back to the menu.

5.3 Functions

5.3.1 Overview of functions

Switching the appliance on and off

Temperature recording

Manually starting automatic defrosting

Settings

Access to this function can be blocked using a PIN code. (see 5.3.6 Settings menu access protection)

Info

Temperature

Temperature alarm

Door alarm

Light alarm

Alarm simulation

Alarm forwarding

	Sensor calibration
	Maintenance reminder interval
	Lighting*
	Language
	Temperature unit
	Screen brightness
	LAN *

	Factory reset

5.3.2 Switching appliance on and off

Using this setting the entire appliance can be switched on and off.

Switching on the appliance

Without activated DemoMode:

Fig. 64

► Carry out steps (see Fig. 4649) .

With activated DemoMode:

Fig. 65

► Carry out steps (see Fig. 4650) .

Note

Deactivate DemoMode before the countdown finishes.

Fig. 66

► The temperature appears on the display.

Switching off the appliance

- Call up the settings menu. (see 5.2 Navigation)
- Press the navigation menu arrow repeatedly until the corresponding function is displayed.

Fig. 67

► Carry out steps (see Fig. 4652) .

► The standby symbol appears on the display.

5.3.3 Temperature

The temperature depends on the following factors:

- How often the door is opened
- How long the door is open for
- The room temperature of the installation site
- The type, temperature and amount of refrigerated items

Note

The temperature may differ from the temperature displayed in some areas of the interior.

Setting the temperature

- Call up settings menu. (see 5.2 Navigation)
- Press the navigation menu arrow repeatedly until the corresponding function is displayed.

Fig. 68 Changing temperature from 5.5°C to 6.9°C

- Carry out steps (see Fig. 4653) .
- ▷ Temperature is set.

5.3.4 Temperature recording

The appliance displays the minimum and maximum temperatures of the interior. The recording of these temperatures starts automatically after the appliance is switched on; they are recorded at one minute intervals. A note indicating that the data memory is full is displayed after 999 hours (approx. 40 days). The temperature recording should then be reset.

Note

We recommend resetting the temperature recording once **after reaching the set temperature** when the appliance is commissioned. This ensures that the value displayed for the maximum temperature is a meaningful value.

Displaying temperature recording

The temperature recording displays the length of the recording and the minimum and maximum temperatures measured during this period of time.

Fig. 69

- Tap navigation arrow repeatedly until corresponding functions are displayed.
- ▷ Status screen with the temperature recordings is displayed.

Resetting temperature recording

The displayed minimum and maximum temperatures can be reset at any time. This deletes the displayed values and the recording interval starts again.

- Tap navigation arrow repeatedly until corresponding function is displayed.

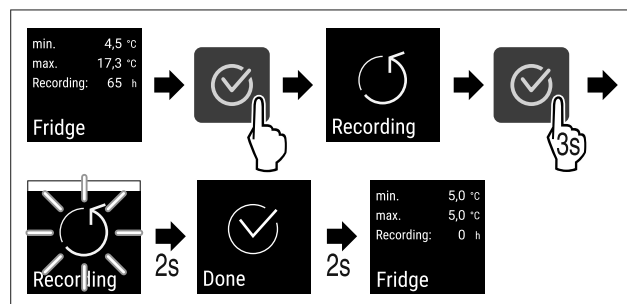

Fig. 70

- Complete steps (see Fig. 4655) .
- ▷ Temperature recording is reset.

5.3.5 Lighting

The appliance is equipped with interior lighting.

You can keep the interior lighting on continuously. (see 5.3.5.2 Switching on lighting*) *

When you open the appliance door, the interior lighting switches on.

Switching off lighting*

- Open settings menu (see 5.2 Navigation) .
- Press the navigation arrow repeatedly until the corresponding function is displayed.

Fig. 71

- Carry out steps (see Fig. 4656) .
- ▷ Lighting is switched off.

Switching on lighting*

- Open settings menu (see 5.2 Navigation) .
- Press the navigation arrow repeatedly until the corresponding function is displayed.

Fig. 72

- Carry out steps (see Fig. 4657) .
- ▷ Lighting is switched on.

5.3.6 Settings menu access protection

This setting enables the settings menu access protection via a three-digit PIN code.

Use

Application:

- Prevent settings and functions being changed unintentionally.
- Prevent the appliance from being switched off unintentionally.
- Avoid unintentional temperature adjustment.

Activating the settings menu access protection

- Open the customer menu. (see 5.2 Navigation)
- Tap navigation arrow repeatedly until corresponding function is displayed.

Fig. 73

- Complete steps (see Fig. 4658) .
- ▷ Settings menu access protection is activated.

Deactivating the settings menu access protection

- Open the customer menu. (see 5.2 Navigation)
- Tap navigation arrow repeatedly until corresponding function is displayed.

Fig. 74

- Complete steps (see Fig. 4659) .
- ▷ Settings menu access protection is deactivated.

Changing the access protection PIN code for the settings menu

See: (see 5.3.7 Access codes)

Opening protected settings menu

If the access protection is active, it is necessary to enter the PIN code to open the settings menu.

After entering the correct PIN code, the settings menu remains unlocked for 20 minutes unless you jump back to the status display.

Note

- In the following example, the PIN code is: **2 3 4**.

Access protection for the settings menu must be active.

- Tap navigation arrow repeatedly until corresponding function is displayed.

Fig. 75

- Complete steps (see Fig. 4660) . Enter PIN code.
- ▷ The PIN code is correct.
- ▷ The settings menu opens.

5.3.7 Access codes

Various settings are possible.

Application:

- Changing the settings code.
- Resetting the settings code.

Settings menu access protection

Changing the settings code

This setting allows the settings code for settings menu access protection to be changed.

The setting is made in 3 stages:

- Entering the old settings code
- Entering the new settings code
- Confirming the new settings code

Note

- In the following example, the default factory-set settings code **1 1 1** is changed.
- The new settings code is: **2 3 4**
- Open the customer menu. (see 5.2 Navigation)
The access protection for the settings menu must be active. (see 5.3.6 Settings menu access protection)
- Press the navigation arrow repeatedly until the corresponding function is displayed.

Fig. 76

- Carry out steps (see Fig. 4661) .
- ▷ Entry of the old settings code successful.

Fig. 77

- Carry out steps (see Fig. 4662) .
- ▷ Entry of the new settings code successful.

Fig. 78

- Carry out steps (see Fig. 4663) .
- ▷ Confirmation of the new settings code.
- ▷ The settings code has been changed.

Resetting the settings code

The settings code for the settings menu access protection has been forgotten or is not known.

- Reset the appliance to factory settings (see 5.3.27 Factory reset) .
- ▷ The appliance is reset to the original settings.
- ▷ The factory-set settings code is: **1 1 1**

5.3.8 Maintenance interval reminder

Setting for the time interval after which a maintenance reminder is issued.

The following values can be set:

- 7 days
- 14 days
- 30 days
- 60 days
- 90 days
- 180 days
- 360 days
- 720 days
- 1080 days
- Off

Setting maintenance interval reminder

The following steps describe how the maintenance interval is set.

- Call up settings menu. (see 5.2 Navigation)
- Tap navigation arrow repeatedly until corresponding function is displayed.

Fig. 79

- Complete steps (see Fig. 4664) .
- ▷ The time interval, after which the maintenance reminder is issued, is set.
- ▷ The remaining time is displayed.

5.3.9 Language

This setting allows the display language to be set.

Setting the language

- Open settings menu (see 5.2 Navigation) .
- Press the navigation arrow repeatedly until the corresponding function is displayed.

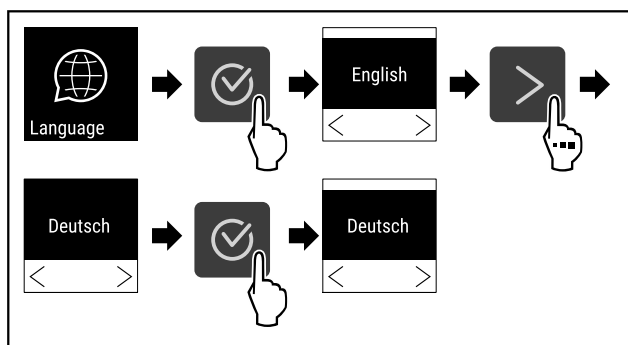

Fig. 80

- Complete the steps (see Fig. 4665) .
- ▷ The selected language is set.

5.3.10 Temperature unit

This setting allows the temperature unit to be changed between degrees Celsius and Fahrenheit.

Setting the temperature unit

The example shows how to change the temperature unit from degrees Celsius to Fahrenheit.

- Open settings menu (see 5.2 Navigation) .
- Press the navigation arrow repeatedly until the corresponding function is displayed.

Fig. 81

- Complete the steps (see Fig. 4666) .
- ▷ The temperature unit is set as Fahrenheit.

5.3.11 Display brightness

This setting allows the display brightness to be adjusted incrementally.

The following brightness values can be set:

- 40%
- 60%
- 80%
- 100% (default)

Setting the display brightness

The following steps describe how to reduce the display brightness, e.g. from . 100 % to 40 %.

- Open settings menu (see 5.2 Navigation) .
- Press the navigation arrow repeatedly until the corresponding function is displayed.

Fig. 82

- Complete the steps (see Fig. 4667) .
- ▷ The display brightness is changed accordingly.

5.3.12 Alarm Sound

This function enables all alarm sounds, such as the door alarm, to be switched on and off.

Activating Alarm Sound

- Open the customer menu. (see 5.2 Navigation)
- Press the navigation arrow repeatedly until the corresponding function is displayed.

Fig. 83

- Complete the steps (see Fig. 4668) .
- ▷ Alarm Sound is activated.

Deactivating Alarm Sound

- Open the customer menu. (see 5.2 Navigation)

- ▶ Complete the steps (see Fig. 4669).
- ▷ Alarm Sound is deactivated.

Activating Key Sound

-
- ```

graph LR
 A[Key sound] --> B[Checkmark]
 B --> C[Key sound]
 D[Hand] --> B

```

- ▶ Complete the steps (see Fig. 4670).
- ▷ Key Sound is activated.

- ▶ Complete the steps (see Fig. 4671).
- ▷ Key Sound is deactivated.

Use of the Liebherr SmartMonitoring Dashboard at <https://smartmonitoring.liebherr.com> requires installation of a SmartModule and a commercial MyLiebherr account. When commissioning online you can register using your login data, or register again and create a company account.

## Note

Make sure that the following requirements are fulfilled:

- ❑ SmartModule *Fig. 87 (1)* is in use.

You commission and set up your SmartModule online via the [Liebherr SmartMonitoring Dashboard](#) on your web-enabled device.

On the [Liebherr SmartMonitoring Dashboard](#) information is also available about retrofitting the SmartModule.

► Open the [Liebherr SmartMonitoring Dashboard](#) (see Fig. 4673).

On the fridge or freezer:

- 

- ▶ Complete the steps (see Fig. 4.674) .
- ▶ Continue the set-up procedure on your web-enabled device: [Liebherr SmartMonitoring Dashboard](#)

- ▶ Connection is established (see Fig. 4675) .
- ▷ WiFi connecting appears. The symbol flashes.
- ▶ Follow the [Liebherr SmartMonitoring Dashboard](#) instructions.
- ▷ Connection is established.

## Disconnecting

- Open settings menu (see 5.2 Navigation) .

- ▶ Tap navigation arrow repeatedly until corresponding function is displayed.

*Fig. 91*

- Complete the steps (see Fig. 4676).
- ▷ There is no connection.

## Resetting connection

- ▶ Open settings menu (see 5.2 Navigation) .
- ▶ Tap navigation arrow repeatedly until corresponding function is displayed.

*Fig. 92*

- Complete the steps (see Fig. 4677) .
- ▷ The WiFi settings are restored to the factory settings.

### 5.3.15 LAN connection

## Note

Use of the Liebherr SmartMonitoring Dashboard at <https://smartmonitoring.liebherr.com> requires installation of a SmartModule and a commercial MyLiebherr account. When commissioning online you can register using your login data, or register again and create a company account.

This setting establishes a wired connection between the appliance and the internet. The connection is controlled via the SmartModule. The appliance can be integrated via the browser-based [Liebherr SmartMonitoring Dashboard](#) and advanced options and customized methods relating to control, administration and monitoring can be used.

### Note

Accessories are available from Customer Service (see 8.3 Customer service) and the Liebherr-Hausgeräte store at [home.liebherr.com/shop/de/deu/zubehor.html](https://home.liebherr.com/shop/de/deu/zubehor.html).

*Fig. 93*

Make sure that the following requirements are fulfilled:

- ❑ SmartModule Fig. 93 (1) is in use.
- ❑ A network cable is connected.

## Establishing a connection

You commission and set up your SmartModule online via the [Liebherr SmartMonitoring Dashboard](#) on your web-enabled device.

On the [Liebherr SmartMonitoring Dashboard](#) information is also available about retrofitting the SmartModule.

Fig. 94

- Open the [Liebherr SmartMonitoring Dashboard](#) (see Fig. 4679).

On the fridge or freezer:

- ▶ Call up the settings menu. (see 5.2 Navigation)
- ▶ Tap navigation arrow repeatedly until corresponding function is displayed.

*Fig. 95*

- ▶ Complete the steps (see Fig. 4680) .
- ▷ Connection is established: LAN connecting appears. The symbol flashes.
- ▶ Follow the [Liebherr SmartMonitoring Dashboard](#) instructions.
- ▷ Connection is established.

## Disconnecting

- ▶ Call up the settings menu. (see 5.2 Navigation)
- ▶ Tap navigation arrow repeatedly until corresponding function is displayed.

Fig. 96

- Complete the steps (see Fig. 4681).
- ▷ There is no connection.

### 5.3.16 Info

This display shows the model, serial number and service number of the appliance.

#### Displaying Info

- Press the navigation arrow repeatedly until the corresponding function is displayed.

Fig. 97

- ▷ The appliance information appears.

### 5.3.17 Operating hours

The display shows the appliance operating hours.

#### Displaying operating hours

- Open the customer menu.

Fig. 98

- ▷ The operating hours appear.

### 5.3.18 Software

The display shows the software version of the appliance.

#### Displaying the software version

- Open the customer menu.
- Press the navigation arrow repeatedly until the corresponding function is displayed.

Fig. 99

- ▷ The software version is shown.

### 5.3.19 Defrosting

The appliance defrosts automatically in normal mode.

#### Application:

- If there is excessive ice in the interior, the defrosting function can be started manually.

#### Manually starting automatic defrosting

- Tap navigation arrow repeatedly until corresponding function is displayed.

Fig. 100

- Complete steps (see Fig. 4685).
- ▷ Automatic defrosting has been started. The appliance automatically switches back to normal mode once defrosting has finished.

#### Canceled manually started defrosting

- Tap navigation arrow repeatedly until corresponding function is displayed.

Fig. 101

- Complete steps (see Fig. 4686).
- ▷ Manually started defrosting is canceled. The appliance automatically switches back to normal mode.

#### Defrosting info

This setting adjusts the display during an automatic defrosting process.

The following display variants are available:

- **Def 1:** "Automatic defrosting process" note is displayed in the status screen. The temperature display is not updated and shows the last temperature before the automatic defrosting process was started.
- **Def 2:** "Automatic defrosting process" note is displayed in the status screen. The temperature display is updated continuously and shows the actual temperature.

## Use

- **Def 3:** The temperature display is not updated and shows the last temperature before the automatic defrosting process was started.
- **Def 4:** The temperature display is updated continuously and shows the actual temperature.

**Defrosting** Fig. 102 “Automatic defrosting process” note

- Open the customer menu. (see 5.2 Navigation)
- Tap navigation arrow repeatedly until corresponding function is displayed.

Fig. 103

- Complete steps (see Fig. 4688).
- ▷ The desired display variant has been selected.

### 5.3.20 Sensor calibration

The sensor calibration is used to realign differences between the temperature displayed and the actual temperature in the appliance.

Setting range: +/- 3 Kelvin in 0.1 Kelvin increments.

#### Calibrating the sensor

- Call up settings menu. (see 5.2 Navigation)
- Tap navigation arrow repeatedly until corresponding function is displayed.

Fig. 104

- Complete steps (see Fig. 4689).
- ▷ The sensor is calibrated.

### 5.3.21 Temperature alarm

The temperature alarm is triggered as soon as the interior temperature differs from the adjustable temperature range and any set delay time has elapsed.

The following values can be set:

- Lower temperature limit in 0.1 °C increments
- Upper temperature limit in 0.1 °C increments
- Alarm delay time of between 0 and 60 minutes
- Alarm repetition frequency of between 0 and 30 minutes

#### Setting temperature alarm

- Call up settings menu. (see 5.2 Navigation)
- Tap navigation arrow repeatedly until corresponding function is displayed.

Fig. 105

- Complete steps (see Fig. 4690).
- Tap navigation arrow repeatedly until corresponding function is displayed.

Fig. 106

- Complete steps (see Fig. 4691).
- ▷ Lower temperature limit has been set.

Fig. 107

- Complete steps (see Fig. 4692).
- ▷ Upper temperature limit has been set.

Fig. 108

- Complete steps (see Fig. 4693).
- ▷ Alarm delay time has been set.

Fig. 109

- Complete steps (see Fig. 4694).
- ▷ Alarm repetition interval has been set.
- ▷ Temperature alarm has been set.

#### Displaying set temperature alarm values

- Open settings menu (see 5.2 Navigation).
- Tap navigation arrow repeatedly until corresponding function is displayed.

Fig. 110

- Complete steps (see Fig. 4695).
- Tap navigation arrow repeatedly until corresponding function is displayed.

Fig. 111

- Complete steps (see Fig. 4696).
- ▷ Set temperature alarm values are displayed.

### 5.3.22 Door alarm

Set the time interval after which the door alarm sounds when the door is opened.

The following values can be set:

- 15 seconds
- 30 seconds

- 60 seconds
- 90 seconds
- 120 seconds
- 150 seconds
- 180 seconds
- Off

#### Setting the door alarm

The following steps describe how to set the time interval before the door alarm sounds.

- Open settings menu (see 5.2 Navigation).
- Press the navigation arrow repeatedly until the corresponding function is displayed.

Fig. 112

- Carry out steps (see Fig. 4697).
- Press the navigation arrow repeatedly until the corresponding function is displayed.

Fig. 113

- Carry out steps (see Fig. 4698).
- ▷ The door alarm is set.

#### Deactivating the door alarm

The following steps describe how to deactivate the door alarm.

- Open settings menu (see 5.2 Navigation).
- Press the navigation arrow repeatedly until the corresponding function is displayed.

Fig. 114

- Carry out steps (see Fig. 4699).
- Press the navigation arrow repeatedly until the corresponding function is displayed.

Fig. 115

- Carry out steps (see Fig. 4700) .
- ▷ The door alarm is deactivated.

## 5.3.23 Light alarm

This setting allows the visual alarm messages in the display to also be emphasized by flashing appliance lighting.

### Activating the light alarm

- Open settings menu (see 5.2 Navigation) .
- Press the navigation arrow repeatedly until the corresponding function is displayed.

Fig. 116

- Carry out steps (see Fig. 4701) .
- Press the navigation arrow repeatedly until the corresponding function is displayed.

Fig. 117

- Carry out steps (see Fig. 4702) .
- ▷ The light alarm is activated.

### Deactivating the light alarm

- Open settings menu (see 5.2 Navigation) .
- Press the navigation arrow repeatedly until the corresponding function is displayed.

Fig. 118

- Carry out steps (see Fig. 4703) .
- Press the navigation arrow repeatedly until the corresponding function is displayed.

Fig. 119

- Carry out steps (see Fig. 4704) .
- ▷ The light alarm is deactivated.

## 5.3.24 Alarm simulation

This setting makes it possible to simulate a change in the appliance temperature to check the function of any safety devices that may be connected.

### Starting alarm simulation

- Call up settings menu. (see 5.2 Navigation)
- Tap navigation arrow repeatedly until corresponding function is displayed.

Fig. 120

- Complete steps (see Fig. 4705) .
- Tap navigation arrow repeatedly until corresponding function is displayed.

Fig. 121

- Complete steps (see Fig. 4706) .
- ▷ The simulation has been performed.
- ▷ Connected safety devices should have triggered.

## 5.3.25 Alarm relay

This setting makes it possible to relay one or more alarms to an external alarm source connected to the appliance.

The following settings can be selected:

- Alarm type:
  - Door alarm
  - Temperature alarm
  - Door alarm and temperature alarm
  - All
- Confirm:
  - **Yes:** Alarm is stopped on the appliance and on the externally connected appliance.
  - **No:** Alarm is acknowledged on the appliance and remains active on the external appliance until the error is remedied.
- Update (only visible if Yes is selected in response to Confirm):
  - **Yes:** Alarm is recurring according to the set time. (see 5.3.22 Door alarm )
  - **No:** Alarm is continuously acknowledged.

#### Activating alarm relay

- Call up settings menu. (see 5.2 Navigation)
- Tap navigation arrow repeatedly until corresponding function is displayed.

Fig. 122

- Complete steps (see Fig. 4707) .
- ▷ The alarm relay has been set.

#### 5.3.26 DemoMode

If the appliance is in DemoMode all refrigeration functions are deactivated. This is useful, for example, for product demonstrations.

##### Activating DemoMode

- Open the customer menu .
- Press the navigation arrow repeatedly until the corresponding function is displayed.

Fig. 123

- Carry out steps (see Fig. 4708) .

Fig. 124

- ▷ DemoMode is activated.
- ▷ The status display is shown with a "D" in the top left.

##### Deactivating DemoMode

- Open the customer menu .
- Press the navigation arrow repeatedly until the corresponding function is displayed.

Fig. 125

- Carry out steps (see Fig. 4710) .

Fig. 126

- ▷ DemoMode is deactivated.
- ▷ The status display appears.

#### 5.3.27 Factory reset

This function resets the appliance to the factory settings. All settings made up to this point are reset to their original values.

##### Performing factory reset

- Open the customer menu.
- Press the navigation arrow repeatedly until the corresponding function is displayed.

Fig. 127

- Complete steps (see Fig. 4712) .
- ▷ Factory reset complete.

▷ The appliance restarts.

## 5.4 Messages

### 5.4.1 Warnings

Warnings are issued by means of an audio signal and visually via a symbol on the display. The signal gets louder until the warning is acknowledged.

| Message                                                                                                                              | Cause                                                                                                                                                                                                                                                                                                                                                                                                     | Remedy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

## 6 Equipment

### 6.1 Safety lock

The lock in the appliance door is equipped with a safety mechanism.

#### 6.1.1 Locking appliance

Fig. 128

- ▶ Insert key.
- ▶ Turn key anticlockwise by 90°.
- ▷ The appliance is locked.

#### 6.1.2 Unlocking appliance

Fig. 129

- ▶ Insert key Fig. 129 (1).
- ▶ Turn key clockwise by 90° Fig. 129 (2).
- ▷ The appliance is unlocked.

### 6.2 Sensors

The appliance can be equipped with the following sensors for temperature monitoring:

- Safety thermostat sensor
- C sensor

#### 6.2.1 Safety thermostat sensor

The safety thermostat sensor monitors the temperature drop and thus protects against excessively low temperatures (Freeze Protect). If the temperature drops below the threshold value, the appliance regulates the temperature automatically. The error message FRZ. PROT (Freeze Protect) (see 5.4 Messages) appears.

#### 6.2.2 C sensor (control sensor)

The C sensor is permanently installed and regulates the interior temperature of the appliance. You can calibrate the C sensor if necessary. (see 5.3.20 Sensor calibration )

### 6.3 Interfaces

There are various connection options on the back of the appliance.

Fig. 130

#### Note

Screws secure the plugs. To enable disconnection of the plugs, loosen the screws on the left and right.

Fig. 131

- (1) Potential-free alarm output

#### 6.3.1 Potential-free alarm output

#### WARNING

Risk of injury due to electric shock!

- ▶ The appliance may only be connected to an external alarm device by trained specialist personnel.

These three contacts can be used to connect a visual or an acoustic alarm device. The connection is designed for a maximum of **30 V (DC) - 8 A** from a safety low voltage source SELV (minimum current 150 mA).

Fig. 132

- (1)** NO (normally open)  
Connection of an alarm indicator lamp or an acoustic alarm signaling device.
- (2)** COM (common)  
External voltage source
- (3)** NC (normally closed)  
Connection of an indicator lamp that displays the appliance's normal mode.

## WARNING

Short-circuit hazard due to live parts!  
Electric shock or damage to the electronics.

- **Switch off the appliance.**
- Pull out mains plug or switch off fuse.

## Note

A maintenance reminder function can be activated. (see 5.3.8 Maintenance interval reminder)

## Note

We recommend creating a maintenance log in which all work (repairs, checks) performed is documented.

## Note

Liebherr recommends yearly maintenance. For an individual offer, please contact Customer Service (see 8.3 Customer service).

## 7 Maintenance

### 7.1 Maintenance schedule

Maintenance work is to be performed at regular intervals to ensure proper appliance function.

## CAUTION

Danger of injury and damage due to unprofessional maintenance work!

Personal injury and material damage.

- Maintenance work may only be performed by trained specialist personnel.

| Component                        | Activity                                                                                                                                                                                                                                                                                                                                                                                  | Maintenance interval                                                                |

## 7.2 Defrosting the appliance

### WARNING

Appliance incorrectly defrosted!  
Injuries and damage.

- ▶ Do not use mechanical devices or other means to accelerate the defrosting process, other than those recommended by the manufacturer.
- ▶ Do not use any electrical heating or steam cleaning equipment, naked flames or defrosting sprays.
- ▶ Do not remove ice with sharp objects.

Defrosting is performed automatically. The water from the defrosting process runs out via the drain opening and is evaporated.

If the temperature is set very cold and/or the humidity is very high, the rear wall in the interior may ice up.

Manual defrosting:

- ▶ Switch off appliance. (see 5.3.2 Switching appliance on and off )
- ▶ Disconnect power plug.
- ▶ Store refrigerated items elsewhere.
- ▶ Leave the appliance door open during defrosting process.
- ▶ Soak up remaining defrost water with a cloth, clean the drain opening and the appliance.

## 7.3 Cleaning the appliance

### 7.3.1 Preparing

### WARNING

Short-circuit hazard due to live parts!  
Electric shock or damage to the electronics.

- ▶ **Switch off the appliance.**
- ▶ Pull out mains plug or switch off fuse.

### WARNING

Danger of fire

- ▶ Do not damage the refrigerant circuit.

- ▶ Empty the appliance.
- ▶ Pull out the power plug.

### 7.3.2 Cleaning the housing

#### NOTICE

Improper cleaning!

Damage to the appliance.

- ▶ Only use soft cleaning cloths and ph-neutral all-purpose cleaners.
- ▶ Do not use steel wool or sponges that scour or scratch.
- ▶ Do not use caustic or abrasive cleaning materials or those containing sand, chloride, or acids.

### WARNING

Risk of injury or damage due to hot steam.

Hot steam can cause scalding/burns and damage to surfaces.

- ▶ Do not use steam cleaners.

#### NOTICE

Risk of damage due to short circuit.

- ▶ When cleaning the appliance, make sure no water gets into the electrical components.

- ▶ Wipe the housing down with soft, clean cloth. If very dirty, use lukewarm water with a neutral cleaner. Glass surfaces can also be cleaned with glass cleaner.
- ▶ Clean the condenser coil every year. If the condenser coil is not cleaned, this significantly reduces the efficiency of the appliance.

### 7.3.3 Cleaning fan cover

#### NOTICE

Risk of damage due to short circuit.

- ▶ When cleaning the appliance, make sure no water gets into the electrical components.

#### NOTICE

Improper cleaning!

Damage to the appliance.

- ▶ Only use soft cleaning cloths and ph-neutral all-purpose cleaners.
- ▶ Do not use steel wool or sponges that scour or scratch.
- ▶ Do not use caustic or abrasive cleaning materials or those containing sand, chloride, or acids.

Fig. 133

- ▶ Carefully lever out fan covers from the side Fig. 133 (1) and remove towards the front Fig. 133 (2).
- ▶ Rinse the air slots of the fan covers under running water. If very dirty, use lukewarm water with a neutral cleaner.
- ▶ Leave fan covers to air-dry completely.
- ▶ Reattach fan covers to the appliance.

# Customer support

## 7.3.4 Cleaning the interior

### WARNING

Short-circuit hazard due to live parts!  
Electric shock or damage to the electronics.

- **Switch off the appliance.**
- Pull out mains plug or switch off fuse.

### WARNING

Risk of injury or damage due to hot steam.  
Hot steam can cause scalding/burns and damage to surfaces.

- Do not use steam cleaners.

### NOTICE

Improper cleaning!

Damage to the appliance.

- Only use soft cleaning cloths and ph-neutral all-purpose cleaners.
- Do not use steel wool or sponges that scour or scratch.
- Do not use caustic or abrasive cleaning materials or those containing sand, chloride, or acids.

### Note

- Defrost water drain (see 1.2 Overview of appliance and equipment) : Remove deposits using a thin object (e.g. a cotton bud).

### Note

Do not damage or remove the type plate on the inside of the appliance. The type plate is important for after sales service.

- Open the door.
- Empty the appliance.
- Clean the interior and equipment parts with lukewarm water and a little dish detergent. Do not use any gritty or acidic cleaning agent or any chemical solvent.

## 7.3.5 After cleaning

- Wipe the appliance and equipment parts dry.
- Connect and switch on appliance.  
When the temperature is sufficiently cold:
- Place in items for refrigeration.
- Clean regularly.
- Clean and dust appliances with a heat exchanger (metal grill on rear of appliance) once per year.

# 8 Customer support

## 8.1 Technical data

| Temperature range |              |
|-------------------|--------------|
| Refrigeration     | +3 to +16 °C |

| Maximum load per shelf <sup>A)</sup>           |              |               |                   |  |
|------------------------------------------------|--------------|---------------|-------------------|--|
| Appliance width (see 3.2 Appliance dimensions) | Grid shelves | Glass shelves | Wooden grid shelf |  |
| 600 mm                                         | 45 kg        | 40 kg         | 45 kg             |  |
| 750 mm                                         | 60 kg        | 40 kg         | 60 kg             |  |

A) Heavier loads may result in a slight bending of the shelves.

| Maximum total load and net weight    |              |       |            |

| This product contains one or more energy efficiency class F light sources | LED            |

A) The appliance may contain light sources with different energy efficiency classes. The lowest energy efficiency class is indicated.

| Setup conditions                                     |                              |
|------------------------------------------------------|------------------------------|
| Degrees of pollution (surrounding the appliance)     | PD2                          |
| Ambient temperature                                  | +10 °C to +35 °C             |
| Maximum relative ambient moisture                    | 75%, not condensing          |
| Maximum operating elevation (meters above sea level) | 2000 m / 1500 m (glass door) |

| Electrical values                |               |
|----------------------------------|---------------|
| Nominal voltage                  | 220 - 240 V ~ |
| Maximum power supply fluctuation | +/-10%        |
| Overvoltage categories           | II            |

## 8.2 Technical malfunction

Your appliance is designed and built to ensure it works reliably and has a long service life. If a malfunction nonetheless occurs during operation, please check whether the malfunction is due to an operating error. If this is the case, you will be charged for the cost incurred even if this falls within the warranty period.

You can rectify the following malfunctions yourself.

## 8.2.1 Appliance function

| Defect                                     | Cause                                                                  | Remedy                                                                                                                                                     |
|--------------------------------------------|------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>The appliance is not working.</b>       | → The appliance is not switched on.                                    | ► Switch on the appliance.                                                                                                                                 |
|                                            | → The power plug is not properly inserted in the socket.               | ► Check the power plug.                                                                                                                                    |
|                                            | → There is a problem with the wall socket breaker.                     | ► Check the breaker.                                                                                                                                       |
|                                            | → Power failure                                                        | ► Keep the appliance closed.<br>► If necessary move the refrigerated/frozen items to another fridge or freezer if the power is off for a prolonged period. |
|                                            | → The appliance power plug is not correctly inserted in the appliance. | ► Check the appliance power plug.                                                                                                                          |
| <b>The temperature is not cold enough.</b> | → The appliance door is not closed properly.                           | ► Close the appliance door.                                                                                                                                |
|                                            | → Ventilation is not sufficient.                                       | ► Unclog the ventilation grill and clean it.                                                                                                               |
|                                            | → The ambient temperature is too high.                                 | ► Observe the suitable ambient conditions:                                                                                                                 |
|                                            | → The appliance was opened too many times or for too long.             | ► Wait to see if the required temperature is achieved once again on its own. If not, contact Customer Service (see 8.3 Customer service) .                 |
|                                            | → The temperature is set incorrectly.                                  | ► Set a colder temperature and check after 24 hours.                                                                                                       |
|                                            | → The appliance is too close to a heat source (stove, heater etc).     | ► Move either the appliance or the heat source.                                                                                                            |

## 8.3 Customer service

First check whether you can remedy the fault yourself . If this is not the case, please contact Customer Service.

Please refer to the enclosed “Liebherr Service” brochure for the address.

### WARNING

Unprofessional repair!  
Injuries.

- Repairs and work on the appliance and the power supply cable not described in the Manual (see 7 Maintenance) should only be carried out by a qualified service provider.
- A damaged power cable may only be replaced by the manufacturer, the manufacturer's Customer Service or a similarly qualified person.
- For appliances with an IEC connector, the change can be made by the customer.

- This will help us to provide fast and focused service.
- Follow any further instructions provided by Customer Service.

## 8.4 Type plate

The type plate is inside the appliance. See appliance overview.

Fig. 134

- (1) Appliance designation      (3) Serial No.  
(2) Service No.

### 8.3.1 Contacting customer service

Make sure you have the following appliance information ready:

- ☐ Appliance name (model and index)
- ☐ Service no. (service)
- ☐ Serial no. (S no.)

- Access the appliance information via the display (see 5.3.16 Info) .

-or-

- Refer to the type plate for appliance information. (see 8.4 Type plate)
- Note appliance information.
- Notify Customer Service: Report faults and the appliance information.

## 9 Shutting down

- Empty the appliance.
- Switch off appliance.
- Pull out the power plug.
- Remove appliance connector if required: remove and at the same time move from left to right.
- Clean the appliance. (see 7.3 Cleaning the appliance)
- Leave the door open so that no bad odors form.

### Note

Damage to the appliance and malfunctions!

- After shutting down, only store the appliance at the permitted room temperature of between -10 °C and +50 °C.

### 10 Additional information

Further information on warranty conditions can be found in the enclosed service brochure or on the Internet at <https://home.liebherr.com>.

## Quick Start Guide for everyday use

### Information about using this Quick Start Guide:

- This Quick Start Guide is not a substitute for the full operating instructions nor is it a substitute for appliance training.
- This Quick Start Guide provides support for everyday use and handling the appliance.
- Read the full operating instructions and the safety instructions contained therein.
- This Quick Start Guide is for: SRFvg 35../40../55..
- Scanning the QR code will open the full operating instructions:

### Intended use

This laboratory refrigerator is suitable for professional storage of products at temperatures between 3 °C and 16 °C.

### Foreseeable incorrect use

Do not use the appliance for the following applications:

- Storage and cooling of:
  - Chemically unstable, flammable or corrosive substances
  - Blood, plasma or other body fluids for the purpose of infusion, application or introduction in the human body
- Use in areas with risk of explosion
- Outdoor use or in areas where it is exposed to splash water or damp conditions

### When stocking, observe the following points:

- ☐ Position grid shelves according to the height required.
- ☐ Observe maximum load.
- ☐ When the storage temperature has been reached, load the appliance (compliance with cold chain).
- ☐ Keep the ventilation slots of the recirculation fan free in the interior.
- ☐ Items for refrigeration must not come into contact with the evaporator on the rear wall.
- ☐ Keep liquids in closed containers.
- ☐ Leave space when storing items for refrigeration to ensure adequate air circulation.

## Status display

## Navigating with buttons

| Display and button | Description                                                                                                                              |
|--------------------|------------------------------------------------------------------------------------------------------------------------------------------|
|                    | <b>Forward navigation arrow</b><br>Advances to next menu (submenu).<br>The first menu appears again after the last menu.                 |
|                    | <b>Backward navigation arrow</b><br>Short press: Goes back one menu (submenu).<br>Long press (3 seconds): Returns to the status display. |
|                    | <b>Confirm</b><br>Activates/deactivates function.<br>Opens submenu.<br>Confirms selection. The display switches back to the menu.        |
|                    | <b>Back</b><br>Jumps back one level.                                                                                                     |

## Displaying temperature recording

Fig. 136

- Complete steps (see Fig. 4721) .
- ▷ Temperature recording displays minimum temperature, maximum temperature and length of recording.

## Resetting temperature recording

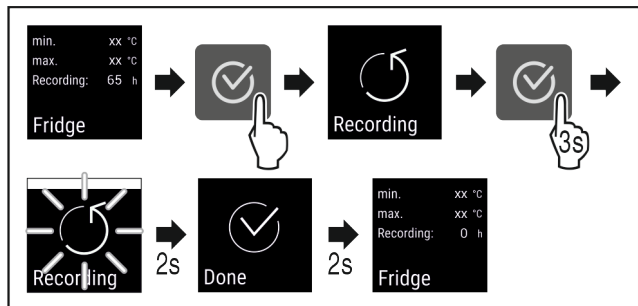

Fig. 137

- Complete steps (see Fig. 4722) .
- ▷ Temperature recording is reset.
- ▷ Recording interval starts again.

## Unlocking appliance

Fig. 138

- ▶ Insert the key. *Fig. 138 (1)*
- ▶ Turn the key clockwise by 90°. *Fig. 138 (2)*
- ▷ The appliance is unlocked.

## Locking appliance

Fig. 139

- ▶ Insert the key. *Fig. 139 (1)*
- ▶ Turn the key anticlockwise by 90°. *Fig. 139 (2)*
- ▷ The appliance is locked.

## Cleaning appliance

- ▶ Empty the appliance.
- ▶ Pull out the power plug.
- ▶ Observe the information in the operating instructions.
- ▶ Dry the appliance and equipment thoroughly after cleaning.
- ▶ Connect the appliance.
- ▶ Switch on the appliance.
- ▶ Load the appliance once the storage temperature is reached.

## What should I do if there is a fault?

A message appears in the display if there is a fault. Messages have different meanings:

| Symbol color in the display | Meaning                                                                                                         | Remedy                                                                    |
|-----------------------------|-----------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------|
| <b>WHITE with black bar</b> | <b>Reminder</b><br>Reminder of general procedures. You can carry out these procedures to eliminate the message. | Consult the operating instructions and perform the troubleshooting steps. |
| <b>WHITE</b>                | <b>Warning</b><br>Appears when there are malfunctions. You can eliminate simple malfunctions yourself.          | Consult the operating instructions and perform the troubleshooting steps. |

If you cannot remedy the fault yourself, contact a competent member of staff or your nearest customer service outlet.
